**DETAILED ACTION**

***Allowable Subject Matter***

1. The indicated allowability of claims 47 and 61 are withdrawn in view of the newly discovered reference(s) to Cosmetro et al. 5127412. Rejections based on the newly cited reference(s) follow.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

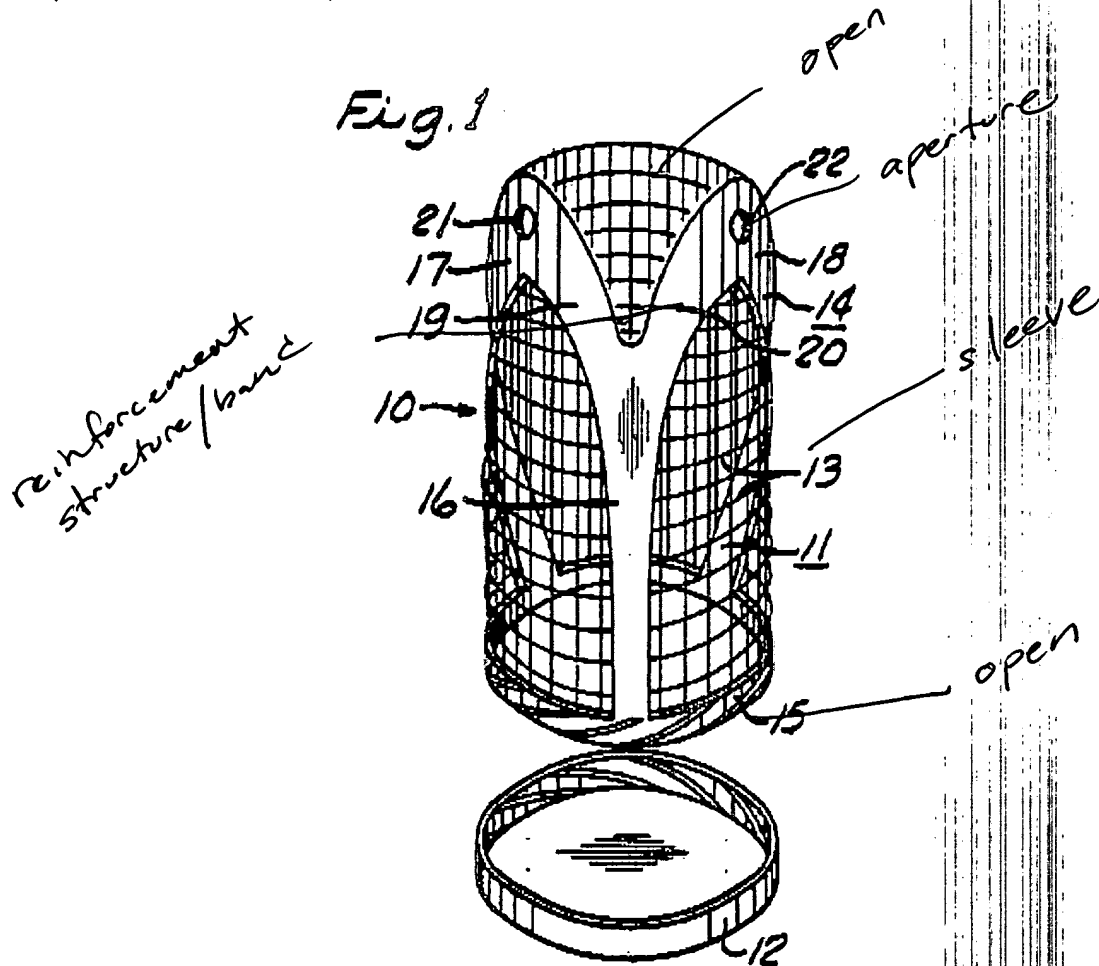

3. Claims 47 and 61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolt 4204282 in view of Cosmetro et al. 5127412.

4. Bolt teaches a sleeve comprising a generally cylindrical portion and an opening at one end, the sleeve further comprising resilient expandable biocompatible material (used within the body); the sleeve further comprising at least one suture aperture; and the sleeve further comprising a reinforcement structure. It should be noted Bolt fails to teach wherein one or more of the aperture has a tapered entry.

5. Cosmetro et al. teaches a device with holes used for guiding the insertion of suture needles. It would have been obvious to one having ordinary skill in the art at the time the invention was made to taper the entry of the holes in bolt as done in Cosmetro

et al. to assist the surgeon in location the of the suture aperture for insertion of the suture (col. 11, lines 17-21).
